Software Assurance & SIP Trunking Incentive

If you're using a 14IP ComXchange (ComX) on-premise phone system, you can get free Software Assurance (SWA) when you add 14IP SIP Trunking.

MSRP for each Subscription Call Path is:

\$17.99/month
on a 36 or 60 month term

Resellers will be billed based on their contract rate (not MSRP).

Get Started Now

How To Qualify

You must meet both of the following:

SIP Trunking Plan

- Must be on a 36 or 60 month contract.
- You can choose which plan term to apply to your SIP trunking location (36 or 60 months).

Call Path Requirement

- You need 1 Subscription Call Path for every 15 licensed stations on your ComX system.
- Example: If you have 150 licensed stations, you need 10 Subscription Call Paths.

How It's Applied

We'll update your existing SIP Trunking location contract with:

- A new start date (today's date)
- A new end date (36 or 60 months later)
- Matching Software Assurance expiration based on the selected plan length

If your ComX already has an active SWA, we'll extend it by 36 or 60 months from its current expiration date.

If your SWA has expired, the new expiration date will be 36 or 60 months from today.

How to Submit

Click the "Get Started Now" button above and fill out the form.

We'll verify your system meets the requirements for the incentive

We'll apply the updates to your SIP Trunking plan and ComXchange Software Assurance.

A support ticket is automatically opened, and you'll receive confirmation in 1-2 business days.

3255 W Highview Drive, Appleton, WI 54914
